FEATURES

The Glass Racking Company range of factory trolleys is constructed from mild steel box section and folded steel for strength and durability, with a galvanized finish for longevity and appearance. The bearing surfaces are all clad in a purpose designed non-marking polymer.

The trolley ledge is 225mm to 340mm wide to provide for bulk storage of single and DGU glass. A range of lengths and heights provides for a variety of applications

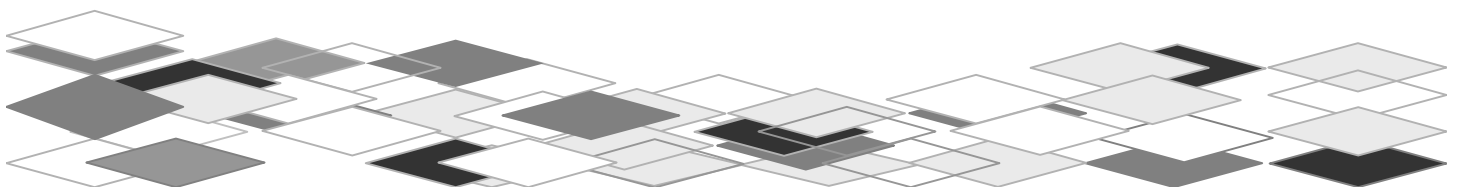

The range includes specific trolleys for

- A. General purpose factory A-frames
- B. General purpose factory L-frames
- C. Harp trolleys for Single glaze
- D. Tooth trolleys for Double glaze

The optional raised base height allows for easier access to the glass load

Optional Safety Arms are available on all factory A-frame trolleys to secure the glass load to the trolley for safe movement around the factory

High quality castors rated at 460kg each support the loaded trolley, and carry the load across uneven floors and through floor debris for many years without failure
