**WITH MORE THAN 100 PRODUCTS FOR LANDSCAPE GARDENERS**

### Metalwork features for your garden

This month we focus on gardenware features to enhance a garden setting. Spring is a great time for gardeners to be active as the plants are at their most healthy, and for many gardening is its most satisfying. For others, this time of year is the annual tidy up the garden so that it will look good and be relatively carefree over the summer months. A great way to dress up gardens and add new character is through metalwork features.

Metal is an ideal medium for gardenware as it's permanent and available in a range of finishes to suit the needs of the customer and the look and feel of the garden setting. We manufacture in a range of metals including stainless, aluminium, wrought iron and corton steel. With raw, galvanised, and powdercoated finishes in a range of colours the options for the customer are endless.

At this time of year we especially like working with customers on makeovers of large gardens where the customer is seeking innovation and ideas.

We've been designing and fabricating all these products for over 20 years and are keen to work with you on your next project.

## .... Other garden metalwork features .....

## Ian's thoughts

The combination of an All Blacks world cup victory and the occasionally balmy summers day tend to help build the much needed positivity and business confidence back into our community. We've enjoyed a busy couple of months and have some business lined up for the new year, so our focus is currently on generating factory man-hours for the months of November and December. I hope your business has fared well through the latter stages on winter and that you have good months forecast.

Please include us in your next gardenware or metalwork solution. We are keen to help and we are good at what we do.

If you need metalworking services please give us a try.

Contact me or anyone of the team anytime on 03-3603373 (option 2) or [ian@metalcraft.co.nz](mailto:ian@metalcraft.co.nz)
