## 3.5M DELIVERY KEY FEATURES

Strength and weight carrying is maximised by T6 aluminium extrusions for main rack construction, supported by galvanised steel structure and top and bottom rack brackets.

Significant volume carrying by maximising external ledge width and rack dimensions, plus providing for volume storage on the internal racks.

Quick loading and unloading using spring and strap poles with non-marking rubber polymer load retention blocks and scissor clamps.

Safety for users and other road users.

Ease of repair and maintenance due to the glass racks having high tensile mono-bolted construction. Damaged or worn parts are easily removed, replaced or upgraded.

Longevity is provided through low maintenance materials.

Proven track record in the industry.
