

# THE GLASS RACKING COMPANY

## Innovation by Design

### Safety Arms for Factory Trolleys

The Glass Racking Company Safety Arms support the glass load when a factory trolley is being moved around a factory. This provides security for the product and safety for the users.

## SAFETY ARM KEY FEATURES

- ✓ Very simple design
- ✓ The arm is aligned with the trolley to ensure that the supporting face is parallel with the load
- ✓ The Safety Arm slides in and out with the load volume
- ✓ The Safety Arm face that holds the load has the same grey non-marking polymer bearing surface as used on the trolley supports and ledge
- ✓ This product was developed in January 2008. All of The Glass Racking Company trolleys since this date have the base slot for the Safety Arm
- ✓ The Glass Racking Company trolleys built before January 2008 can be retrofitted with the Metalcraft Safety Arm and base slot
- ✓ Other manufacturers trolleys may be able to be retrofitted and will be assessed on a case by case basis
- ✓ The Safety Arm is a structurally solid product with a gold zinc coating to allow the Safety Arm to be easily seen in the factory, simplifying implementation and management of the factories safety policy
