

THE GLASS RACKING COMPANY

Innovation by Design

TRANSPORT TROLLEY SYSTEM

The Glass Racking Company transport trolley system has been developed to allow users to reduce double handling of glass products within the factory and when delivering to customers. The system comprises transport trolleys, purpose built trucks, and proven process and procedure.

TRANSPORT TROLLEYS

The Glass Racking Company transport trolleys have been developed with the glass industry with the following goals :

1. Allow loading direct from the DGU production line
2. Secure the glass load safely and quickly
3. Allow quick and safe loading to a purpose built vehicle using either forklifts or overhead cranes
4. Engineer certifications for safety and law
5. Galvanised for longevity and appearance
6. Allow quick and safe unloading at customer premises

Key components of The Glass Racking Company transport trolleys are :

1. Mild steel construction for strength and durability, galvanised for longevity
2. Aluminium components for reduced weight
3. Quality USA castors for long life and ease of movement
4. Safety arms for securing the glass within the factory, and the strap pole glass retention system for transportation
5. Handles for movement around the factory
6. Engineer certified lifting eyes and forklift pockets for craning the transport trolleys onto and off the trucks, and also for onsite work
7. All bearing surfaces clad in non-marking polymer
8. A tongue and container lockdown point for ease of securing onto a purpose built truck
9. Ability to carry DGUs up to 2000mm x 1700mm with optional endplates to avoid overloading

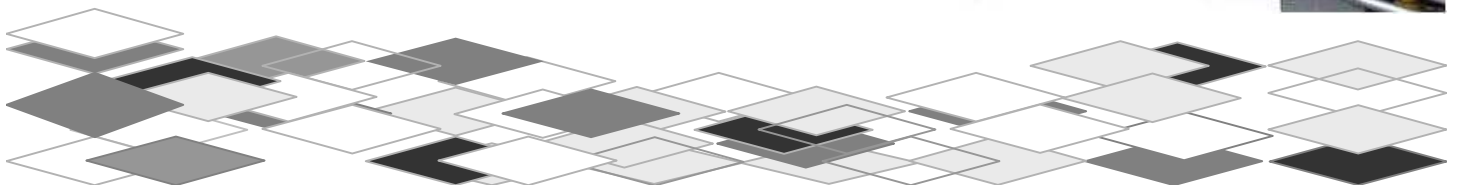

TRANSPORT TROLLEY TRUCKS

The Glass Racking Company transport trolley trucks have been developed with the glass industry with the following goals :

1. Quick and safe loading and unloading of pre-loaded transport trolleys
2. Engineer certified securing system
3. Provision for both transport trolley glass and also oversize glass
4. A scaleable solution from small to large trucks and trailers
5. Curtain sided for security and advertising

Key components of The Glass Racking Company transport trolley trucks are :

1. Side loaded for ease of load and unload of transport trolleys
2. A full length flat glass storage system on the non-loading side for oversize glass
3. Options for incorporating other types of glass and window transportation alongside transport trolleys
4. Engineer certified container lockdown and tongue based trolley securing system to ensure a safe and secure load
5. Recessed deck to allow the transport trolley castors to assist with positioning while not hindering the securing of the trolley
6. Curtain sided design to protect the load from the weather and road debris, and also to provide for extensive advertising
7. Available on a range of different truck manufacturers cab chassis

SYSTEMS

The Glass Racking Company has been supplying the glass industry with transport trolley solutions for many years, and has developed many processes and procedures to assist customers to maximise the benefit received through using this system.

Also available are trolley lifters to assist with the overhead crane loading of transport trolleys into a covered truck, and also a rear mounted Moffett forklift to enable the driver operator to complete all loading and unloading with minimal disruption at site.

SUMMARY OF THE BENEFITS

Benefits of The Glass Racking Company transport trolley system include :

1. Reduced double handling of glass, leading to time savings and reduced damage and rework
2. Improved service provided to the glass companies customers by assisting with reducing their double handling and damage
3. The trucks ensure that both transport trolleys and oversize glass is delivered to the customer on one vehicle in one visit, for reduced cost
4. This is a proven system that is currently used by many glass companies

HOW TO PURCHASE

The Glass Racking Company transport trolley solutions typically have impact and benefits across many parts of the glass business, not just transportation, including sales and account management, and manufacturing. The Glass Racking Company provides a no-cost appraisal of your business and the suitability of this system for you.
