## 43" SITE CART KEY FEATURES

Strength and weight carrying is maximized by steel construction, hot dip galvanized for longevity

The load bearing surfaces of the base blocks, horizontal supports, and faces of the safety arms are all covered in The Glass Racking Company non-marking polymer to protect the load

The entire trolley disassembles for transportation to site as the base (with castors), back support frame, and safety arms

The safety arms slot into the base and slide in and out with the volume of load. They are angled at 5 degrees like the support frame and hold the load secure

Assembled dimensions are 43" long, 57" total height, 24" deep. Total weight is 121 pounds. Maximum loading of the castors is 3700 pounds.
