## TRAY BED PICKUP RACKS

- A range of Pickup bodies is available to fit onto the base cab chassis, providing a full Pickup flat bed plus glass carrying racks outside the wheels on both the drivers and passengers side.
- This design suits dedicated glass carriers, and those requiring large glass volumes and sheet sizes.

## A-FRAME PICKUP RACKS

- A range of A-frame racks is available to fit onto the pickup flat bed. The A-frame glass racks can be built to have a storage unit within the A-frame, and the A-frame can be easily removed.
- This design suits multi-purpose glass carriers, those requiring smaller glass volumes and sheet sizes, and those requiring the benefits of the factory bed.

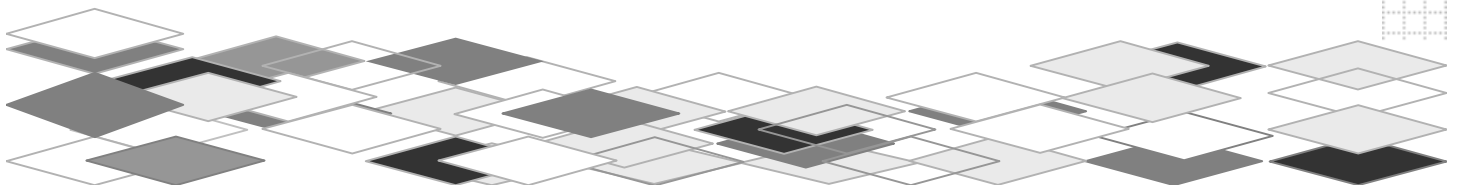

## OEM BED RACKS

- A range of racks for OEM beds is available. Racks can be built as single, double, triple and quad design depending on loads required.
- This design suits multi-purpose glass carriers, and those requiring the benefits of a manufacturers bed.

## PICKUP GLASS RACK OPTIONS

- Length and height of the racks can be configured to suit the needs of the user
- Gas fillers are moved for easy access even when the racks are loaded
- Rear tailgate for safety of deck mounted hardware and tools
- Removable module allows access to wheels
- 18" height extension is standard on drivers side, and optional on the passengers side.
- Standard lights can be replaced with LED lights for easier installation and maintenance
- A range of fitout options is available for both the body and bed
- Quality signage and branding

## BENEFITS

On the Pickup body, strength and weight carrying is maximized by T6 aluminum extrusions for main rack construction, supported by galvanized steel sub-frame and top and bottom rack brackets. The rack is all aluminum for strength and reduced weight

Significant volume carrying by maximizing external ledge width and rack dimensions

Quick loading and unloading using non-marking polymer load retention blocks and scissor clamps

Safety for users and other road users

Ease of repair and maintenance due to the glass racks having high tensile mono-bolted construction. Damaged or worn parts are easily removed, replaced or upgraded

Longevity is provided through low maintenance materials

### PICKUP RACKS
