

# Product Specifications

## Curtain Sided Glass Trucks Large

## Product Summary

The Large Curtain-Sided Glass Truck delivers robust, long-distance glass transport with premium protection and loading efficiency. Designed with external and internal racks and curtain-side or rear access and opening roof for crane loading/unloading. It supports large-format glazing and commercial deliveries. Heights range from 2.4 m to 2.9 m, with body lengths up to 10.7 m. Each truck is custom-built from the cab chassis up, using proven components and 20 years of development expertise.

## Specifications

- Body lengths: 6.7 m – 10.7 m (6×4 or 8×4 chassis)
- Heights: 2.4 m - 2.9 m
- External racks: stepped pockets between axles
- Internal racks: hardwood ply deck with inlaid aluminium slot base
- Roof: hard roof or glide-top canvas roof system
- Fuel tank relocated for increased front pocket width

## Options

- Full-width, narrow or fold-out rear step
- 3.5 T Towbar (with removable pintle)
- Sprung pin-pole or strap retention systems
- External scissor clamps
- Curtain systems with custom graphics or sign writing

## Key Features

### High-Volume Transport Capability

Built for long-haul operations with body lengths up to 10.7 m and load heights to 2.9 m.

### Glide-Top Roof System

Full-length roof slides forward to the cab, allowing crane loading of glass packs or crates from above.

### Pocket-Mount Rack Design

External frails step in between front and rear wheels for enhanced stability and taller glass storage ledges.

### Custom Chassis & Axle Upgrades

Chassis extensions and added axles increase payload and reduce road user charges for cost-efficient operation.
