

# Product Specifications

## Corner ProFoams

## Product Summary

Corner Reveals ProFoams provide enhanced protection at reveal junctions, preventing chips, dents, and surface damage where edges meet. Designed to clip neatly onto corners, each foam measures 100 mm long per side with a 76 X 51 mm profile. Compatible with all three reveal widths, they're typically used alongside 200 mm standards to create full perimeter protection. Ideal for transport, installation, and finishing environments where edge safety is critical.

## Specifications

- 100 mm long per side
- Standard profile: 76 × 51 mm or 80 mm tall × 50 mm wide
- Closed-cell polyolefin copolymer construction
- 20 mm thick bearing surface for compression under load
- Non-marking, high-grip texture
- Fits all three reveal widths
- Highly flexible; recovers after compression
- UV-resistant and low water absorption
- Resistant to abrasive road debris

## Options

- Standard Corner ProFoams – 100 mm on each side (80 × 50 mm)
- Large Corner ProFoams – 100 mm per side (76 × 51 mm profile)
- Custom lengths available for specific applications
- DGU edge-protection variants on request

## Key Features

### Secure Corner Protection

Clips firmly onto corner reveals to shield vulnerable edges from chips, dents, and abrasion during transport and handling.

### Flexible, Long-Life Polymer Construction

Closed-cell polyolefin copolymer flexes without breaking, recovers to its original shape, and offers long service life even under constant compression.

### Non-Marking, High-Grip Surface

Soft, textured surface grips the reveal, protects sensitive powder-coated finishes, and prevents movement in transit.

### Full Perimeter Compatibility

Designed to clip onto all three reveal widths; used in conjunction with 200 mm standards for complete frame protection.
