

Product Specifications

Concertina Racks

Product Summary

Concertina glass storage racks that maximise floor space efficiency, provide fast bay access, and create safer bulk pack storage through mechanical bay separation.

Specifications

- Manual Concertina Racks
- Bay size customised to stock sheet dimensions
- Number of bays based on required glass types
- Bay foot width set to suit glass volume
- Manual geared handle separates bays
- Arms retain glass securely in each bay
- Bays open approx. 800 mm work space
- Engineered to suit glass weight
- Floor-fixed installation
- Fully welded construction
- Painted finish for durability and visibility

Options

- Custom bay count and configuration
- Variable bay widths per product mix
- End fixed racks for high-turnover items
- Safety signage and colour coding for glass types

Key Features

Maximised Storage Density

Concertina movement halves the floor space needed vs traditional A-frames.

Fast Access for Staff & Machinery

Bays open to create clear 800 mm working aisle for safe loading and unloading.

Customised for Stock Sheet Formats

Bay size, quantity, and spacing tailored to required storage capacity and glass types.

Stable, Engineered Build

Fully welded frames, engineered for load weight, and fixed to floor for safety.
