

Product Specifications

Curtain Sided Glass Trucks Small

Product Summary

The Small Curtain-Sided Glass Truck is built for local and regional deliveries, offering maximum protection in a compact form. With full-length external wheelover racks, internal storage, and a rear roller door for easy loading, it provides exceptional functionality in a smaller footprint. Curtain sides safeguard glass loads from weather and debris, while non-marking polymer surfaces and secure pole retention ensure fast, damage-free transport of windows, doors, and flat glass.

Specifications

- Body length: 3.5 m - 4 m
- External racks: 4 m long X 2.6 m high (wheel-over design)
- Internal driver-side rack: 4 m long X 1.9 m high
- Chassis: 4—2 truck chassis
- Access: curtain sides + rear roller door
- Construction: steel frame with non-marking polymer-clad bearers

Options

- Rear roller door (or container-style doors)
- Rear step (300 mm) with optional towbar
- Workshop bench or storage box fit-out
- Custom signage and branding

Key Features

Compact Wheel-Over Design

Full-length external racks are carried over the wheels for maximum glass-carrying capacity in a compact footprint.

Dual-Rack Configuration

Includes both external and internal glass racks to safely carry a wide range of window and door products.

Curtain-Side Access

Curtain sides provide fast, convenient access to glass loads while keeping materials protected from weather and debris.

Built in Durability

Designed and fabricated locally using high-quality components for long-term strength, reliability, and service life.
