

# Product Specifications

## A-Frame Van Racks

## Product Summary

Internal A-frame glass racks designed for safe, organised transport. Dual-sided storage increases capacity while non-marking retention systems protect every panel in transit.

## Specifications

- Aluminium A-frame construction
- Hardwood plywood floor base with raised blocks
- Strap poles with non-marking sliding retention blocks
- Slotted base system for adjustable pole location
- Available in single- or double-sided configurations
- Suitable for internal van installation or deck-mounted setups
- Designed to fit vehicle length and required glass height

## Options

- Single- or double-sided A-frame configurations
- Fixed internal frame or slide-out rack system
- Internal storage box integration
- Removable mounting option for flexible use
- Custom sizing to suit specific vehicle layouts and workflows

## Key Features

### Dual-Sided Capacity

Two loading sides maximise glass capacity and keep weight balanced for safer handling.

### Secure Strap-Pole Retention

Strap poles with non-marking sliding blocks and polymer bearers hold glass firmly and prevent surface damage.

### Raised Blocks & Hardwood Floor

Raised base blocks and a hardwood plywood floor set glass position and protect during transit.

### Fixed or Slide-Out Systems

Sized to the length and working height of your vehicle for efficient space use and safer load positioning. Choose fixed internal frames or slide-out A-frames for faster loading and easier access.
