

# Product Specifications

## Standard Packlifters

## Product Summary

Engineer-certified packlifters for moving glass packs safely from container to storage and around the factory, with non-marking protection and multiple size options.

## Specifications

- Designed for lifting and handling packs of flat glass
- Top lifting eye for crane attachment
- Handles at each end for positioning
- Glass supported on plastic-coated feet
- Retention arms with protective plastic coating
- Fully engineer-certified load capacity
- Welded construction with painted finish
- Available in multiple sizes (see options)

## Options

### Available Sizes

- Small – approx. 1860 mm pack height
- Medium – approx. 2440 mm to 2750 mm pack height
- Jumbo – approx. 3200 mm pack height (jumbo sheets)
- Custom sizing available for different sheet formats

### Options

- Breakdown (flat-pack) packlifter design for reduced freight costs
- Additional safety arms and adjustments
- Custom colour finishes
- Extended polymer protection on all contact surfaces
- Safety Packlifter versions for USA market (medium and jumbo):
  - Adjustable feet for variable block spacing
  - Breakdown shipping format
  - Additional structure for stability
  - Added base-level retention arms

## Key Features

### Safe Pack Handling

Arms retain packs firmly against the frame while plastic-coated feet support the load securely.

### Non-Marking Contact Surfaces

All retention points are polymer-clad to prevent scratching, chipping or abrasion.

### Crane-Ready Design

Top lifting eye and carry handles enable safe movement by crane or manual positioning.

### Engineer-Certified Construction

Every packlifter is certified to the load rating required for each glass pack size.
