

# Product Specifications

## Swing Racks

## Product Summary

Space-efficient swing racks for storing job-lot glass with fast access, engineered leaves that swing effortlessly under load, and non-marking protection for glass surfaces.

## Specifications

- Engineered L-frame leaves for storing glass and window products
- Leaf size and load rating customised to each application
- Freestanding welded structure
- Hinged leaves designed for low-effort swinging under glass weight
- Approximately half the floor space of standard A-frame racks
- Painted finish for durability and visibility
- Optional mezzanine floor structure above for additional storage

## Options

- Custom leaf dimensions and capacities for product mix
- Additional leaf quantity depending on storage volume
- Colour coding for batch or glass type identification
- Overhead storage mezzanine integration
- Crane access compatibility for top loading

## Key Features

### Space-Saving Storage

Swinging leaves reduce floor space requirements up to 50% compared with traditional A-frame systems.

### Easy Access to Specific Items

Individually hinged leaves allow quick selection and handling of specific glass panels or windows.

### Non-Marking Glass Protection

Rear surfaces are clad in Metalcraft polymer to prevent scratches and surface damage.

### Flexible Loading Direction

Glass can be safely loaded and unloaded from the front or from above where crane access is available.
