

Product Specifications

Windscreen Racks

Product Summary

Lightweight aluminium windscreen racks with soft polymer contact surfaces and secure camlock retention, designed for factory, storage or vehicle use.

Specifications

- Constructed from lightweight aluminium for durability
- Standard sizes available: 5-slot and 10-slot
- Custom sizes manufactured to suit specific vehicles or layouts
- Polymer-covered raised base blocks support windscreen edges
- Foam pole and copolymer camlock retention system
- Removable vertical posts for bulk stacking
- Breaks down and packs flat for storage
- Designed and fabricated in Australasia

Options

- Length extensions for truck windscreens
- Retention system adaptable to other rack designs
- Single or multiple rack configurations for vehicles or workshops
- Custom mounting systems for slide-out and internal racks
- Branding and signage enhancements for professional presentation

Key Features

Soft, Non-Marking Protection

Polymer and foam bearers protect windscreen edges from chips, scratches and pressure damage.

Secure Camlock Retention

Copolymer cams rotate to clamp each screen in place, preventing movement in transit.

Flat-Pack for Space Efficiency

Rack disassembles fully and stacks flat for compact storage when not in use.

Adaptable for Mixed Applications

Designed for use in vans, trucks or workshops – removable posts allow stacking damaged screens.
