

Product Specifications

Fixed A-Frame & T-Frame Trailers

Product Summary

High-capacity window transport trailers designed for fast, damage-free loading using a pole-based retention system, with A-frame or T-frame configurations to suit workflow and tow-vehicle capability.

Specifications

(example configuration)

- Approx. 6 m deck length x 2.4 m width (customisable)
- Full-length A-frame with approx. 2.1 m height and 4° lean angle
- Dual-braked wheels on 14-inch rims with heavy-duty tyres
- Trailer rated approximately 3175 kg GVM
- Approx. 28 mm in hardwood container plywood deck
- Inlaid slotted bases for pole placement and sliding window units
- Pull-out ramp approx. 3 m for safe loading of heavy units
- Two under-deck storage bins sized for extrusion and beading
- Polymer-insert bearing surfaces on aluminium supports
- Rated to carry approx. 25 m³ of window frames, depending on load rating and towing capacity configuration
- Galvanised structural steel for strength and longevity
- Pole-based window retention system with foam-clad poles and reveal foams
- Suitable for towing with large SUV-class vehicles with correct tow rating

Options

- T-frame configuration for alternative window loading arrangements
- Painted finish option in place of hot-dip galvanised
- Custom signage boards inside A-frame for branding
- Demountable frame for loading direct from production floor
- Custom dimension changes for specific vehicle fleets
- Additional toolboxes or storage solutions
- Traditional rope/strop tie-down options for oversized units

Key Features

Large Volume Transport

Engineered to carry significant window loads safely and legally on standard tow-rated vehicles.

Fast Loading & Unloading

Ramp access and pole-based retention reduce handling time and minimise damage and rework.

Durable Industrial Construction

Galvanised frame, hardwood deck and non-marking polymer bearing surfaces designed for heavy commercial use.

Flexible Frame Configuration

Choice of A-frame or T-frame geometry depending on product mix and loading method.
