

Product Specifications

Curtain Sided Glass Trucks Medium

Product Summary

The Medium Curtain-Sided Glass Truck combines strength, storage, and versatility for mid-scale operations. Featuring up to 6.5 meters of external load over two areas, external racks and internal driver-side glass storage (1.9 m high). Curtain sides provide easy side access, while a rear roller door enables smooth loading. Built on a durable cab chassis, it offers long service life, optional signage, and custom fitouts for tools, storage, or workshop setups.

Specifications

- Body length: 4.8 m - 6.7 m
- External racks: up to 5.7 m long X 2.6 m high and 3 m x 1.9 m over rear wheels
- Internal driver-side rack: 6 m long X 1.9 m high
- Chassis: 4Ã—2 truck cab chassis
- Roof: hard or optional glide-top roof
- Access: rear container style door + curtain sides
- Construction: steel frame with non-marking polymer-clad bearers

Options

- Container-style rear doors
- 3.5 t Towbar or fold-out rear step (300 mm)
- Storage box or shelving fit-out
- Custom curtain graphics and signwriting

Key Features

Increased Load Capacity

Extended deck and taller racks accommodate larger glass panels and frames while maintaining stable handling.

Dual-Rack System

Internal and external racks maximise space efficiency while keeping glass loads securely separated during transport.

Curtain-Side & Rear Access

Curtain sides and a rear curtain style door simplify loading and unloading from any position.

Built for Strength & Longevity

Mounted on a 4Ã—2 truck chassis and built with premium materials for a durable, long-life transport solution.
