

# Product Specifications

## Internal Rack

## Product Summary

Metalcraftâ€™s most popular internal rack system, featuring a raised ledge and secure strap-pole retention for safe, reliable transport of glass and joinery inside vans.

## Specifications

- Available for most van makes and models
- Aluminium construction with raised base blocks
- Non-marking polymer-clad bearers protect glass surfaces
- Self-locking strap poles with sliding retention blocks
- Rack angle approximately 3-5 degrees for load stability
- Sized to suit the internal dimensions and layout of each vehicle
- Timber flooring can be supplied bare or lined with rubber or carpet

## Options

- 100 mm or 250 mm load width options
- Rack heights available: 1.2 m or 1.5 m
- Single- or double-sided rack configurations
- Timber floor options including hardwood ply, rubber or carpet lining
- Inlaid slotted timber bases for wider load capability
- Front-mounted foot racks for specific layouts
- Bespoke sizing to suit vehicle and workflow requirements

## Key Features

### Trusted Worldwide

Proven ledge-based rack design used by glazing professionals across New Zealand and worldwide.

### Secure Strap-Pole Retention

Self-locking strap poles with sliding non-marking blocks allow fast load securing with consistent pressure.

### Raised Base Blocks + Defined Ledge Support

Glass and joinery rest on a clear base platform for accurate loading and straightforward positioning.

### Custom-Fit for Any Van Layout

Multiple ledge widths and rack heights available to suit your vehicle and workflow requirements.
