

Product Specifications

A-Frame + L-Frame Trolleys

Product Summary

Factory handling trolleys designed for safe storage and movement of flat glass, panels and joinery, with non-marking bearing surfaces and high-capacity castors for smooth operation.

Specifications

A-Frame Trolleys

- A-frame construction for balanced support
- Standard sizes: 1.1 m L X 0.9 m H, 2.0 m L X 1.2 m H and 2.0 m L X 1.9 m H
- Standard ledge from 220 mm
- Mild steel construction
- Bearing surfaces clad in non-marking polymer
- Quality 150 mm castors rated at 460 kg each
- Welded construction for long-term durability

L-Frame Trolleys

- L-frame design for oversized glass and window units
- Approx. 4000 mm long X 2500 mm high
- Eight 150 mm castors rated at 460 kg each
- Single 400 mm ledge with 8 raised base blocks
- Seven horizontal supports for load stability
- Non-marking polymer bearing surfaces with end caps

Options

A-Frame Trolleys

- Custom height and length manufacturing
- Raised base heights for easier access
- Company-colour paint finish or hot-dipped galvanised finish
- Safety arms for load restraint
- Signage panel options

L-Frame Trolleys

- Additional safety arms for handling wide loads
- Custom castor configurations for weight capacity
- Branding and signage enhancements
- Adaptable retention systems for different glass sizes
- Options for paint or hot-dip galvanised finish

Key Features

Purpose-Built for Factory Handling

Designed for moving glass, joinery and flat panels safely through production environments.

Non-Marking Polymer Protection

All contact surfaces are polymer-clad to eliminate scratching or edge damage.

Heavy-Duty Manoeuvrability

Quality 150 mm castors rated to 460 kg each ensure long life and smooth travel over uneven floors.

Configurable for Specific Loads

Supplied in multiple sizes with optional safety arms, raised bases and custom fabrication options.
