

Product Specifications

Air Float Tables

Product Summary

Automated air-float cutting tables for heavy and jumbo glass handling, with hydraulic tilt operation, breaker bar options, and fire-retardant felt cutting surfaces.

Specifications

- 3.9M X 3M Air Float Cutting Table
- Approx. 3900 mm long X 3000 mm wide X 880 mm tall
- Suitable for floating glass up to approximately 12 mm
- Hydraulic tilt with pop-out feet support
- Fire-retardant felt cutting surface
- Hardwood breakout edge for scribed glass
- Heavy-duty adjustable feet for levelling
- Table-mounted push-button controls (remote optional)
- Automated breaker bar options on X and Y axes
- Welded construction and painted finish
- Other Available Table Sizes
 - Approx. 3000 mm X 2000 mm air-float table
 - Approx. 5400 mm X 3400 mm air-float table
 - Custom sizes based on the required cutting format

Options

- Air-operated breaker bars (X and Y axes)
- Foot-controlled, remote key or table-mounted controls
- Tilt function automation upgrades
- Custom table sizing for specific stock sheet formats
- Dedicated breakout table integration
- Branding and colour customisation

Key Features

Air-Float Technology

The blower system lifts heavy glass, reducing friction and effort during positioning.

Automated Tilt Operation

Hydraulic tilting with pop-out feet enables safer loading and unloading of large sheets.

Breaker Bar Integration

Air-powered breaker bars are available on X and Y axes for faster, accurate breakout.

Built for Heavy Factory Use

Fully welded structure, precision levelling and controls designed for high-volume cutting.
