

Product Specifications

Heavy Glass Trailers

Product Summary

Large capacity, glidetop-roof glass transport trailers engineered for heavy loads, long-haul routes, and mixed fleet operations. Designed for maximum storage, safer handling, and high-volume glass transport.

Specifications

- Curtain-sided design for concealed, weather protection
- External racks with front pocket and wheel-over section for stock sheets
- External ledge width approximately 250 mm
- Glidetop roof for overhead loading into internal racks
- Low-loader deck height approximately 720 mm
- Internal deck constructed from hardwood plywood
- Proven load retention system used across Metalcraft transport products
- Dual-axle chassis with manual or electric brake options
- Rear doors available in container style, fold-down ramp, or curtain system
- Slide-out 3 m rear ramp with rear steps for easy internal access
- Ramp enables winching and storage of transport trolleys inside the trailer
- Angled front storage area for tooling and accessories
- Neck of trailer provides additional storage capacity
- Configurable to tow vehicle requirements and glass size specifications

Options

- Size and height configuration for both small and large trailers
- Single or dual-axle setups with brake choices
- Internal racks with inlayed slotted base for retention poles
- Height extensions in 100 mm increments
- Scissor clamps for increased retention reach
- Custom storage compartments and load-out fitouts
- Branding and signage opportunities on curtain sides
- Trailer setup configured to towing vehicle rating

Key Features

Curtain-Sided External Rack Access

Load and unload glass easily from both sides while keeping loads concealed and protected in transit.

Secure Non-Marking Retention System

Sliding retention blocks and strap or sprung poles hold glass firmly without surface damage.

Configurable Load Capacity

Trailer length, rack height, and braking systems are tailored to suit glass size and towing requirements.

Onboard Storage & Equipment Capability

Space for trolleys, tools and ladders with fold-down ramp and optional crane compatibility.
