

# Product Specifications

## Glass Trolley Trucks

## Product Summary

Transport trolley trucks are engineered to reduce double handling and increase delivery efficiency, supporting both trolley-based and oversized glass transport on one vehicle.

## Specifications

- Purpose-built for transport trolleys and glass panels
- Side loading for fast handling of trolley units
- Flat storage system on the non-loading side for oversized glass
- Engineer certified container lockdown and tongue securing system
- Recessed deck to assist trolley positioning and stability
- Curtain-sided design for protection and advertising
- Compatible with new cab chassis or retrofit installations
- Hybrid options with storage compartments and fixed racks
- Crane fork and Moffett forklift compatibility
- Scalable solutions for small to large trucks and trailers

## Options

- New build or retrofit installation options
- Hybrid truck systems with racks, storage and flat panel capacity
- Support for both transport trolleys and oversized glass
- Trolley lifters for crane loading into covered trucks
- Rear-mounted Moffett forklift compatibility
- Custom branding applications on curtain sides
- Selection of cab chassis manufacturers supported

## Key Features

### Eliminates Double Handling

Pre-loaded transport trolleys move from factory to truck to site without reloading, reducing damage and labour.

### Flexible Truck Integration

Available as new builds or retrofits using existing truck bodies, frames and equipment.

### Oversize Glass Capability

The non-loading side provides full-length flat storage for large sheets and panel products.

### Curtain-Sided Protection

Protects loads from weather and road debris while enabling full-length external branding.
