

# Product Specifications

## Corner Facing ProFoams

## Product Summary

Reveal Corner Face ProFoams are designed to protect delicate finishes where aluminium surfaces meet wooden frames. Measuring 100 X 100 mm and 60 mm high, these precision-formed foams clip securely onto corner reveals to prevent scuffs, dents, or surface damage during transport and installation. Ideal for glazing, joinery, and mixed-material assemblies, they provide reliable protection and a professional finish at critical junction points.

## Specifications

- Size: 100 x 100 mm, 60 mm high
- Precision-formed closed-cell copolymer
- Soft, non-marking bearing surface
- Compressible 20 mm contact layer
- High UV resistance
- Very low water absorption
- Designed for aluminium, timber, and hybrid frames
- Reusable and flexible, returning to original shape after compression

## Options

- Standard Corner Facing ProFoams
- Custom height and slot dimensions
- Longer lengths and DGU/IGU variants
- Bulk supply for large fabrication operations

## Key Features

### Non-Marking Corner Protection

Designed to protect aluminium-to-timber and mixed-material junctions from scuffs, dents, and abrasion.

### Secure Clip-On Fit for Corner Reveals

100 x 100 mm profile clips firmly onto corner intersections for reliable positioning during handling and transport.

### Spring-Back Copolymer Construction

Closed-cell copolymer compresses under load and returns to shape even after long periods, ensuring long product life with minimal breakage.

### Versatile Protection for Glazing & Joinery

Suitable for windows, doors, commercial suites, mixed-material assemblies, and DGU/IGU edge protection.
