

Product Specifications

Export Packlifters

Product Summary

Breakdown packlifters designed for export shipping and global use, featuring engineer-certified load ratings, polymer-protected retention surfaces and additional safety arms for secure transport of glass packs.

Specifications

General Specifications

- Designed for lifting glass packs from containers and into storage
- Breakdown frame for efficient export shipping
- Engineer-certified for specific load capacities
- Plastic-coated retention arms and feet
- Non-marking polymer on all glass contact surfaces
- Handles at each end for manual positioning
- Painted finish in custom colours available
- Available Sizes
 - **Small** approx. 1860 mm pack height
 - **Medium** approx. 2440 mm to 2750 mm pack height
 - **Jumbo** approx. 3200 mm pack height for jumbo sheets
 - **Custom** height options on request

Options

- Additional safety retention arms for enhanced load restraint
- Adjustable feet for different block configurations
- Breakdown-kit format for lower-cost global transport
- Extended polymer protection upgrades
- Training guides and online video support

Key Features

Breakdown for Export Shipping

Modular structure enables compact packing for lower freight cost and easier international delivery.

Enhanced Safety Retention

Additional arms and adjustments secure packs tightly during container unloading and factory moves.

Full Non-Marking Protection

Polymer-coated contact surfaces prevent edge and surface damage to stacked glass packs.

Crane & Manual Handling Ready

Top lifting eye and end handles support safe positioning throughout the supply chain.
