

Product Specifications

Finger Trolleys

Product Summary

Finger-style factory trolleys designed to support glass and window units horizontally between processing stages, with non-marking polymer protection and heavy-duty castors.

Specifications

- Designed for horizontal staging of glass and window units
- Metalcraft lipped steel fingers with non-marking polymer inserts
- Plastic end caps on contact components for edge safety
- Dimensions built to suit application
- Choice of low or tall finger supports
- 2 fixed castors and two braked turning castors rated approximately 460 kg each
- Polymer rear bump surface optional
- Fully welded construction
- Painted finish for durability and appearance
- Designed and fabricated in Australasia

Options

- Multiple vertical configurations
- Low or tall finger profiles based on load type
- Custom dimensions for specific production lines
- Polymer rear cladding for soft bumper function
- Signage and colour branding options

Key Features

Horizontal Processing Support

Ideal for staging glass and windows flat during fabrication and finishing operations.

Non-Marking Polymer Protection

All contact surfaces are polymer-clad to prevent scratches, chips or edge abrasion.

High-Capacity Castors

Braked turning castors and fixed castors rated ~460 kg each ensure safe, controlled handling.

Configurable Vertical Supports

Available in two-vertical or multi-vertical layouts to suit various unit sizes and workflows.
